HTML, CSS, Javascript, React, Redux, Node.js, Express, TypeScript, Firebase, MongoDB, PostgreSQL, NoSQL, Git

Projects

ChatApp   04/2023

- Simple Chat App, you can add chat by seraching a user, send messages and receive messages. It has Firebase as BaaS
- Tech used: Typescript | React w/ Firebase

E-Commerce   10/2022

- A web app that displays a Galery of products, with authentication created by me. It lets you register and login. You can add products to a cart and then the payment gateway is Stripe.
- Tech used: Typescript | React w/ Redux Toolkit | MongoDB | Express | JWT

Finanzas Personales   Final / Group Project   06/2022 – 07/2022

- A Web App designed with the aim to facilitate the manual management of one's personal finances. It allows account creation and login with Google Auth and natively and features 2 table views for input and output, Graph Views, Reviews, Admin Tab and other functionalities.
- I collaborated along with 5 colleagues on data management for the front end and took lead of a refactorization addressing a potential issue with the organization of the data, saving many hours of work and headache in the process.
- Tech used: Typescript | React w/ Redux Toolkit | MongoDB | Express

Henry-Dex   Individual Project   05/2022 – 06/2022

- A Web App that consumed the PokeAPI API to display information about every Pokémon. Additionally, the app allowed the user to create their own Pokémons and store them in a PostgreSQL database.
- Tech used: NodeJS | React w/ Redux | PostgreSQL | Express
